

Real Parts. Really Fast.™

CNC Mill Operative **£8.98 to £10.15 per hour (including shift allowance)**

Reporting to:

Team Leader

The Company

At Proto Labs, we're not only one of the fastest growing manufacturing companies in the UK, we're also the fastest in the world at what we do — so being extraordinary is a way of life. If you are looking for an extraordinary career opportunity, you've come to the right place as we are looking for additional people to join our team.

Proto Labs is the world's fastest source for custom prototype and low- to mid-volume parts. With 3D Printing, CNC Machining and Injection Moulding services, our speed and versatility lets you take your parts from the very early stages of prototyping all the way up to short-run production of 10,000+ parts — all with one technology-driven, quick-turn company.

The Role

We are seeking a Machine Setter and Operator to join our team. You will be setting and operating CNC machines, changing tools and loading material. Ideally you will have previous experience in setting computerised machines, preferably CNC milling although this is not essential. You will also be inspecting CNC machined parts and ensure they match the quality standards set by the customer and report any non-conforming parts to the relevant people.

We have two shifts available:

1. Two rotating shifts 6am to 2pm and 2pm to 10pm – Monday to Friday
2. Nights shift 9.30pm to 6am - Sunday and 10pm to 6am - Monday to Thursday

The Candidate

The role will appeal to an individual capable of working in a fast paced environment. You will have the initiative to approach challenges with enthusiasm and the ability to react to rapid changes in prioritisation whilst maintaining a clear focus on the company objectives. Exceptional time management, communication skills and attention to detail are a must and you must be computer literate.

Benefits

- Company bonus scheme
- Company pension scheme
- Childcare vouchers
- Excellent working environment
- www.protolabs.co.uk
