

Operations Trainer **£22,000 to £24,000**

Reporting to

Technical Supervisor

The Company

At Proto Labs, we're not only one of the fastest growing manufacturing companies in the UK, we're also the fastest in the world at what we do — so being extraordinary is a way of life. If you are looking for an extraordinary career opportunity, you've come to the right place as we are looking for additional people to join our team.

Proto Labs is the world's fastest source for custom prototype and low- to mid-volume parts. With our 3D Printing, CNC Machining and Injection Moulding services, our speed and versatility lets you take your parts from the very early stages of prototyping all the way up to short-run production of 10,000+ parts — all with one technology-driven, quick-turn company.

Background

This is a new emerging department that is challenged with a hands on approach to bringing an interesting, enjoyable and 'on the job' style practical training program. Work instructions and standard operational procedures are the focal point to get the teams working efficiently and methodically in line to achieve our internal key performance indicators.

The Role

You will deliver a blend of practical and computer based training for new and existing employees on manufacturing job functions. You will produce and develop existing training material for primarily in-house practical training sessions supported by computer based group presentations of Work Instructions and Standard Operating Procedures. In addition you will maintain accurate training records and liaise with departmental Managers on training needs and skills gaps identified as focal points for the area. Ideally you will have previously worked in a CNC milling, manufacturing or engineering environment.

You will be mainly working days 8.30-5pm Monday to Friday, however you may be required to alter your working hours to deliver training across three shift patterns.

Qualifications, Skills and Experience

- Demonstrated ability to influence and teach others.
- Experience in a manufacturing environment with practical hands on skills an advantage.
- Computer literate, able to add images and develop written material in MS word preferred. MS PowerPoint presentation skills an advantage but not essential.
- Excellent communication skills with patience, tolerance, and an understanding that people learn in different ways and at different rates.

The Candidate

The role will appeal to an individual capable of working in a fast paced environment. Driven to exceed internal departmental expectations of progression through area specific manual skill sets. The individual will have the initiative to approach challenges with enthusiasm and the ability to react to rapid changes in prioritisation whilst maintaining a clear focus on the overall company objectives. High attention to detail, highly organised and excellent communications skills a must.

Benefits

- Company bonus scheme
- Company pension scheme
- Daily flexible working plan
- Childcare vouchers
- Excellent working environment
