

Declaration of Conformity - RoHS

We herewith confirm the conformity of our products with the ROHS directive 2011/65/EU, released by the European Parliament and the Council November 8th 2011, for the restriction of the usage of dangerous substances and the compliance with the permitted ceiling concentration of homogeneous materials, percentage by weight: <0,01% of cadmium, <0,1% of lead, mercury, polybromated biphenyl (PBB) and polybromated diphenyl ether corresponding with appendix II of this directive.

Proto Labs Germany GmbH herewith declares that all our products are manufactured in accordance with RoHS.

Also part of our declaration of conformity is the adaptation of RoHS directive 2015/863 that includes the limitation of four more materials according to an EU resolution from June 4th 2015. The following materials are affected:

- Bis(2-ethylhexyl) phthalate (DEHP) (0,1%)
- Buyl benzyl phthalate (BBP) (0,1%)
- Dibutyl phthalate (0,1%)
- Diisobutyl phthalate (0,1%)

This latest update of the ROHS 3 variation has been implemented at the Proto Labs Germany GmbH.

Declaration of Conformity – REACH

Proto Labs Germany GmbH is a manufacturer of prototypes made in an additive manufacturing process using a range of plastic-based resins and granulates as raw material and is therefore, according to REACH directive 1907/2006 a “downstream user” of those raw materials. Consequently, responsibilities for registration or pre-registration (ECHA) for the fabrication and marketing of substances and chemicals are not applicable.

Products manufactured by Proto Labs Germany GmbH are therefore not to be defined as substances or preparations. Furthermore, under regular circumstances and usage no substances are to evaporate from our products. Consequently, Proto Labs Germany GmbH is neither subject to registration nor subject to the preparation of material safety data sheets.

We ensure the supply of safe products towards our customers by ensuring through appropriate inquiries that our suppliers fulfil all requirements concerning chemical substances and materials as defined by REACH directive 1907/2006 and that no substances listed as substances of very high concern (SVHC) are used for manufacturing our products.

In doing so we keep to the obligation of the “ECHA guideline for downstream users”.

Feldkirchen, 28.11.2019
